

	<h2>Delivery Terms and Conditions of Dry Dairy Products</h2>	NKK-WI-003a	Page 1 van 2
		Version date:	14-10-2019
		Previous Version Date:	05-07-2019

In compliance with the EU prescribed regulations, we impose the following purchase requirements:

### Quality:

- Compliance with microbiological, chemical and physical requirements in accordance with applicable Vreugdenhil purchase specification.
- **The remaining shelf life of the delivered goods must be at least 75% of the total shelf life of the product.**
- We only accept goods that are released **after** examination of the parameters specified in the specification.

### Analysis certificate (CoA)

- The analysis certificate must state a reference to materials supplied by batch code, production date **and** expiration date.
- **The analysis certificate must contain the following parameters:**
  - o **Fat**
  - o **Protein**
  - o **Moisture**
  - o **Ash**
  - o **TPC**
  - o **Yeast and moulds**
  - o **Enterobacteriaceae**
  - o **Salmonella**
  - o **Coagulase positive Staphylococcus**

### Printing on primary packaging (clear, indelible and legible)

- Clear product description
- Oval or EC approval number
- Batch code or production date
- Expiry date
- The net amount per packaging unit
- Name or business name and address of the manufacturer/ packer/ seller or of one established in the Community

### Requirements for transport of bags / big bags:

- The truck must be clean and dry and without strong odour.
- **The truck is exclusively used for transport of closed and packed food stuffs. If liquid food stuffs are transported at the same time, it must be with the use of an IBC. Non-food, feed and other products cannot be loaded at the same time.**
- For big bags a packing list with the weight per big bag must be available.
- For bags a packing list with the number of bags per pallet with corresponding batch code must be available. We accept a maximum of 3 different batch codes in one load.
- **The use of a paper sheet between pallet and big bag is obliged.**
- The pallets must be covered with a top sheet and wrapped with foil or a functional equal solution.
- The pallets must be dry and clean and the bags must be stacked flat on the pallet.
- The bags / big bags must be clean, without damage and free from pests.

### Requirements for bulk transport:

- The truck is regularly cleaned on the outside.
- The truck is only used for transporting food and this is clearly visible on the truck.
- The truck has a walkway with handrail. If the driver needs to climb the truck the handrail shall be used.
- The truck is preferably used only for transporting dairy products (due to allergens). However, in exceptional cases, there may be other previous loads:
  - o Only food.
  - o No allergens (not soy meal, fish meal, etc!).
  - o No animal proteins (other than milk protein).
  - o The truck is internally cleaned before our dairy products are loaded.
- The truck and the hoses are clean, dry and free from strong odour.
- The truck is sealed after loading by the shipper.
- If the seal is broken, the truck will not be unloaded.

		Version date:	14-10-2019
		Previous Version Date:	05-07-2019

**Mandatory on the CMR:**

- The name and address of the sender, the carrier and the receiver.
- The place and date of preparation of the CMR.
- The place and date of loading.
- The date and place where the goods should be delivered.
- A clear product description and the method of packaging.
- The number of packages and batch code or date of manufacture\*
- The net and gross weight of the goods\*
- Oval or EC approval number of the producer\*
- Contract number or purchase order number Vreugdenhil\*

If one or more of the above requirements are not fulfilled we cannot accept the goods.

\* *Can be mentioned on the packing list, if there is a connection between the CMR and the packing list.*
